RAVON[™]
manufatura

It all starts with an idea that takes up to several months to develop. Ideas for Ravon products are born from observing the world, people and their needs. Today's world is very dynamic, we are stimulated constantly and receive a lot of new information, our needs change and our requirements grow. When designing a utilitarian object, we are aware of the changing nature of the world and we must balance these dynamics to create a product that is equally beautiful and useful.

Each of our bathtubs or washbasins is a work of human hands, there is no place for automated mass production. Materials used by Ravon require careful and manual handcrafting, otherwise they would not be as strong, yet subtle and refined.

We always use only high quality materials and semi products that we entrust to technologists at Ravon manufactory. They are expert craftsmen who can make the best products using composite technology developed by Ravon.

Edition data: march 2023

FREESTANDING BATHTUBS

Ravon freestanding bathtubs are manufactured from specialised composite called QualTec. It is a composite based on the same technology that is used in production of high performance cars and sports motorboats. QualTec is resistant to yellowing and tarnishing - which is extremely important not only for the visual effect, but also in the daily use of a product. Furthermore, QualTec bathtubs have perfectly smooth surface and they are impact and scratch resistant.

Tubs made of QualTec are often used in bathrooms, bath salons, sanatoriums and spa centers. At the same time, this material is easy to care for, extremely smooth and can be restored, even at home. Ravon bathtubs are available in a wide range of colors offered by Ravon, as well as in any color from the NCS or RAL palette. Each Ravon bathtub can be customized, for example applying a PuroMetal metal coating to the surface of a tub.

QualTec composite

manufatura

A M B I E N T E

Ravon Ambiente freestanding bathtub is a product made of QualTec, a material that is very popular among customers. It is an oval tub characterised by a streamlined, slightly asymmetrical form, which resembles an almond shell. The shape of the Ambiente bathtub was inspired by an Indian canoe boat. Its form is slender and subtle and looks spectacular in a bathroom. Due to its length (184 cm), Ambiente is especially recommended to tall people. As a result of its size, Ambiente dominates bathroom space and fits spacious interiors.

EUPHORIA

Ravon Euphoria freestanding bathtub is a pioneering and best recognised product of the Ravon manufatura. Made of the highest quality QualTec composite, it remains very popular among customers. Euphoria, apart from the excellent quality of workmanship, is a bathtub that fits both modern and classic interiors, as well as those made in a retro style. The timeless esthetics of the product has been taken care of by our modelers and designers. Euphoria is extremely comfortable and it allows to rest in it perfectly thanks to its ergonomic shape. Euphoria freestanding bathtub is wider and much higher at the head, and its length and contouring ensure a comfortable bath. This product is ideal for enthusiasts of long baths. Euphoria tub is a perfect match for the countertop or freestanding

Euphoria washbasins. Euphoria collection has been nominated for the prestigious „Good Design 2020” competition.

GENESIS

Genesis freestanding bathtub by Ravon is manufactured using the modern technology of multilayer QualTec composite. Genesis is a synergy of simple, symmetrical form and practicality of use. The rim is wide enough to mount any fittings, as well as to place cosmetics on it, thus Genesis will appeal especially to those who love long, aromatic baths. There are very few freestanding bathtub models on the market that offer the option of installing a faucet in the tub rim. Genesis is one of the most popular products of the Ravon manufactory.

M O D E R N

Ravon Modern freestanding bathtub is made of high-quality QualTec composite material. Modern series by Ravon is a classic of a modern style. This bathtub is especially recommended for large, spacious bathrooms. Just as a retro-style bathroom will not do without a traditional claw foot bathtub (on lion's feet), the arrangement of a modern bathroom requires a simple, minimalist form, which can be found in the Modern bathtub.

S P A C E

The Ravon Space freestanding bathtub is a classic example of modern minimalism, and this is perhaps the reason why Space is the manufactory's bestseller. The secret of Space's success lies in its shape, which is not only the essence of minimalism and symmetry, but also the harmony of a perfectly finished form. Space freestanding bathtub therefore successfully accomplishes its mission of being discreetly exposed. Its „modesty“ is full of grace; the form of the bathtub charms and adds a modern touch to bathroom interiors.

SENSUAL WALL

The uniqueness of Sensual wall - adjacent tub lies in its functionality and aesthetics. Sensual is the ideal solution for small bathrooms (tub length 164 cm), where every centimetre counts. The tub has a wide rim (13cm), which may serve as a shelf and at the same time allows for installation of any fittings. The edge of the bathtub is designed in a way that water pours down into the tub. QualTec material from which the tub is made is another advantage of the product.

T U L I P A N O

Tulipano freestanding tub is a finalist in the prestigious Polish competition organised by the Institute of Industrial Design „Good Design 2019” and has also received a distinction in the „Bathroom - Choice of the Year 2020” competition. The form of the tub is defined not only by its timeless and modern design, but also by high quality of QualTec composite material. Thanks to advanced technology, the bathtub has very good thermal insulation that allows the water to stay warm for a longer time. Only certified semi-products of renowned brands are used in production of all Ravon manufactory products.

Tulipano is available in a wide range of colors from the Ravon palette or the NCS and RAL palettes. Finish types available for this and other products offered by Ravon include precious metals such as gold, platinum or silver, as well as semi-precious metals such as copper, nickel and brass. Tulipano freestanding bathtub matches perfectly the Tulipano countertop washbasin.

WISTERIA 160

If the 175 cm long Wisteria is too big for you, Ravon manufatura has created a shorter version of this bathtub. Its sister model - Wisteria is only 160 cm long and 70 wide. This small tub will fit easily into a small bathroom, and, at the same time break the myth of a small bathroom where we can afford only a built-in tub. However, not only its length is important, but also its width (70 cm), which will also save valuable space in a small bathroom. In the end, however, Wisteria is a very comfortable bathtub that will allow you to fully relax. Its profile to a semi-reclined position, guarantees a relaxing experience for the muscles and spine while bathing. The bathtub, like any other Ravon product, is available in any color from Ravon's original palette or in any color from the NCS palette.

Bathtub pedestal

PEDESTAL

The pedestal is intended for installation of a bathtub faucet. It replaces the freestanding floor-mounted faucet, which usually requires the floor to be altered, in case of a pedestal we do not have this problem. In addition, it can be used to put away, for example, a glass of wine or cosmetics. The pedestal, like all Ravon products, is available in a wide range of colors, both in matt and gloss finishes. Color can be matched to the color of the bathtub. It supports installation of 3-hole or 4-hole faucets.

WASHBASINS

Ravon manufactory creates new trends and brings modern and timeless designs to our bathrooms. Ravon washbasins are a synergy of good design and top quality materials that guarantee a beautiful appearance for years. Two technologies used in the production of washbasins ensure durability, high resistance to scratches and damage. The materials used to make the washbasins are easy to care for and recondition. Apart from products in white finish, Ravon offers a wide range of colors from its own color palette as well as from NCS or RAL palettes. Ravon also offers more sophisticated finish styles for its washbasins with metal surfaces, e.g. in gold, silver or copper colors.

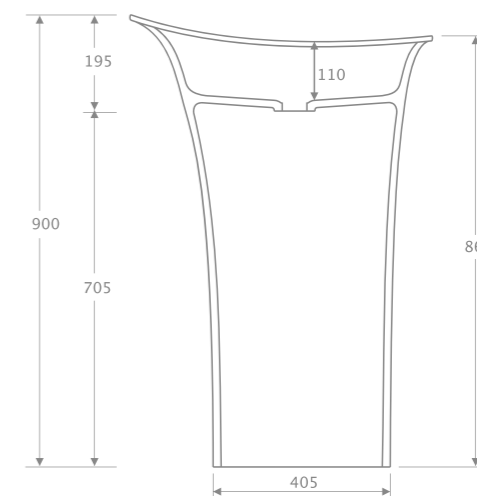

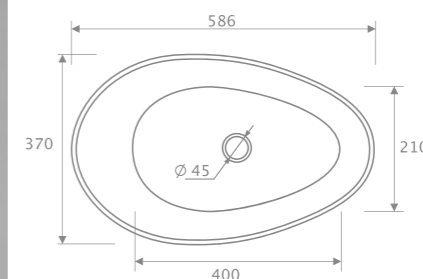

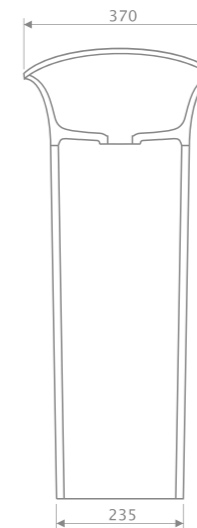

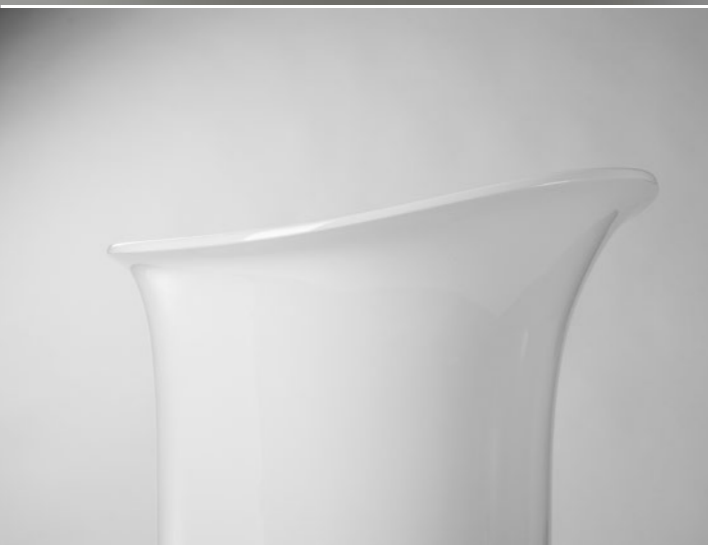

Freestanding washbasin

EUPHORIA

Euphoria freestanding washbasin is an eye-catcher with its original shape and it makes a perfect match with the Euphoria freestanding bathtub. When designing the Euphoria collection we were inspired by nature and the shape of calla flowers, which subtle and asymmetrical lines create an elegant and charming look. The washbasin is available in many colors, both in matte and glossy finish. The product is suitable for installation with floor or wall-mounted concealed fittings.

Euphoria collection has been nominated for the prestigious „Good Design 2020“ competition.

RAVON LIMITED

Ravon Limited and ART product lines are limited edition products. We create bathtubs and washbasins to individual customer orders, they are unique and unrepeatable, so that we can have something really unique in our homes and enjoy it every day.

Ravon bathtub in a wooden housing. The housing is made of solid hardwood of native or exotic species.

RAVON ART

Ravon Space bathtub decorated with graphics inspired by iconic pop art comics. Handmade artwork has been protected with appropriate coatings to ensure safe use.

RAVON **ART**

Ravon Modern bathtub with artwork that is a compilation and reference to famous paintings by Roy Lichtenstein.

RAVON **LIMITED**

Ravon Euphoria bathtub in bi-color finish with a golden stripe at the base, made of PuroMetal, is the most prominent trademark of the manufactory.

RAVON MATERIALS

QUALTEC

Ultra-modern, non-yellowing composite of the highest quality, based on polyester resins, reinforced with chemically resistant fibreglass, finished with a high-grade polymer layer with increased scratch and UV resistance. It is available in any color from RAL or NCS palettes. QualTec is an excellent choice for those who value only the highest quality. This material is very pleasant and warm to the touch, has a perfectly smooth surface, and maintains water temperature perfectly. Its homogeneous structure makes it extremely easy to clean and does not require special cleaning agents. It has a high chemical resistance factor and excellent mechanical strength. There are no limits to the shaping and molding of this material that always maintains its highest strength parameters.

RAVON MATERIALS

MARMONIT

Marmonite is a derivative of commonly called materials such as artificial marble, dolomite, conglomerate. Marmonit is a composite created by Ravon manufactory mainly for manufacturing of simple, clearly outlined, thin walls or angular, more cubistic forms. Marmonite is a plastic material with a heterogeneous structure that is based on two components. While the polyester resins ensure that the sanitary product is consistent, durable, flexible and resistant to mechanical damage, the combination of minerals creates a self-supporting, compact structure that guarantees the structural strength of the final product. The surface of products made in the marmonite technology is very smooth and pleasant to the touch, its durability and appearance is comparable to that of polished marble.

RAVON MATERIALS

PURESTONE

PureStone, which is a mineral-polyester material (Solid Surface type), is very durable and ductile, resistant to various harsh and difficult conditions, and is perfect for public places, public bathrooms, laboratory rooms, where traffic volume and exploitation is very high. PureStone composite is extremely hard yet very smooth and pleasant to the touch. It has a satin surface. Like marmonite, it has a high tolerance for forming unconventional shapes. Ravon offers products made of PureStone in a matt finish.

RAVON MATERIALS

PUROMETAL

PuroMetal is a composite material that can be cast or applied to any Ravon product. PuroMetal shares all the optical and physical properties of the metal it is made from. A unique final finish is achieved by grinding, polishing, patination or oxidation of the surface. PuroMetal is made of 80% pure metal and can be used both indoors and outdoors and will not crack or peel. PuroMetal is available in many different types of metals, such as brass, bronze, copper, „gold“, tin, nickel. It can be processed in various ways, e.g. by brushing or polishing. The final result of the finished surface is unique.

Ravon color palette

We offer a collection of 12 Ravon colours that follow modern trends. We have 3 shades of the extremely fashionable grey, black, which dominates bathroom arrangements, as well as powder pink, which is especially popular among women. All colors are available in matte and glossy finishes.
